SCOPUS ID 15832396300

Research interests: Environment Sustainability, Environmental Pollution, Environmental Analysis, Environmental Chemistry, Environmental Biotechnology, Heavy Metals, Anaerobic Digestion, Waste Treatment, Sludge Treatment, Advanced Biological Processes, Environmental Biodegradation, Biosorption, Constructed Wetlands, Wastewater Reuse, Emerging Contaminants.

Eng. Giusy Lofrano got her PhD Environmental Engineering in 2007 at Salerno University and National Qualification as Associate Professor in Environmental Engineering in 2017. She has over 15 years of post-graduate experience on Environmental protection and Restoration Technologies. She has been involved in many international and national projects as investigator. She is enrolled in editorial boards of several International Journals and she is the Editor of three books dealing with the application of advanced oxidation processes for wastewater treatment and nanomaterials, published by Springer Verlag. She has acted as peer-reviser and pane list at evaluation of many Research and Technology Development projects (EU and national) and papers. She is authors and co-author of more than 100 publications in the field of environmental engineering and science.
