

7th International Symposium on

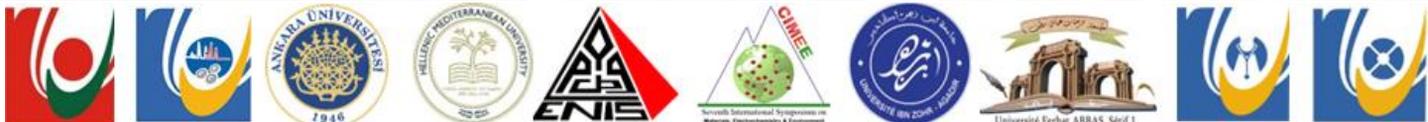

CIMEE'25

Materials, Electrochemistry & Environment

Theme: Advancing sustainability through Materials, electrochemistry and green energy

Call for abstract
Third circular announcement

Deadline
August 2025

Dear distinguished scholars, academics, students, guests, friends, partners and delegates from all universities and organizations both in Lebanon and around the world,

On behalf of the entire program committee, It is a great pleasure and an honor to extend to you a warm invitation to attend the 7th International Symposium, CIMEE25 will be held in Tripoli, Lebanon from 25th to 27th September 2025.

During these three days a broad range of topics will be covered in scientific sessions in the form of oral presentations and poster sessions. There will also be invited lectures from renowned researchers from all over Middle east, Maghreb and Europe, each of them intricately connected to the conference topics.

The main challenges currently facing the planet are primarily environmental and economic, with strong interconnections. These two points are the basis for the preparation of this CIMEE'25 edition.

Environmental issues related to sustainable development have gained increasing visibility. Today, the concept of sustainable development is widespread throughout the world; it is articulated at the regional and local levels. It seeks a balance between the social and the ecological, and environmental science, which combines many fields such as biology, chemistry, physics, geology, and ecology, helps address these environmental challenges. By using science, we can examine the main causes of major environmental problems such as climate change, pollution, preservation of natural resources, and THEREFORE, we can provide a comprehensive and lasting solution to major environmental issues and make the planet sustainable. This requires actions and the implementation of a resilient and sustainable development model.

The goal of the conference is to create an environment where both young and senior researchers can interact, share knowledge, and foster collaboration. This includes facilitating the exchange of ideas, promoting networking opportunities, and providing a platform for professional development for all participants.

The CIMEE25 conference offer a platform for researchers to receive feedback on their work through oral or poster presentations and covers a broad range of topics :

T 1. Materials & the environment

T 2. Electrochemistry, Bioelectrochemistry & environment

T 3. Atmospheric chemistry & Environmental Pollution

T 4. Structural, Analytical & Physical chemistry

T 5. Agro-GeoEnvironment, Agro-Chemistry & Biogeochemistry

T 6. Climate change, Coastal & Marine ecosystem.

Please feel free to contact us for any additional information. <https://cimee-science.org/index.php/cimee25/>
We are looking forward to welcoming you soon!

Best regards

The CIMEE'25 Organizing Committee
